EDUCATION

B.Tech in Computer Science and Engineering

2023 – 2027

Noida Institute of Engineering and Technology (NIET), Greater Noida | CGPA: 8.70

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Frontend: React.js, Redux Toolkit, Tailwind CSS, React Router, Vite

Backend: Node.js, Express.js, Socket.io, REST APIs, JWT Authentication, Mongoose

Databases: MongoDB, Appwrite

Deployment: Docker, Vercel, Render

Tools: Git, GitHub, VS Code, Postman, Linear,

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design

EXPERIENCE

Software Development Engineer Intern | Hexaclimate Solutions Pvt. Ltd., Gurugram

Feb 2026 – Apr 2026

- Authored 22-page technical documentation for a web-based Land Management System, detailing system architecture, data flow, and 13+ product modules for cross-team reference.
- Performed API validation using Postman and analyzed backend workflows and production code, collaborating with developers to troubleshoot data-flow issues and verify fixes across 4+ core modules.
- Built structured test suites and defect reports, driving quality improvements across Tracker, GIS Mapping, Dashboard, and Project workflows through enhancement recommendations.

PROJECTS

CollabBoard | Real-time Collaborative Whiteboard

React, Vite, Redux Toolkit, Node.js, Express.js, Socket.io, MongoDB, Tailwind CSS

Live | GitHub

- Built a scalable real-time collaborative whiteboard supporting concurrent multi-user drawing, live cursors, chat, and persistent canvas synchronization using MERN and Socket.io.
- Resolved WebSocket race condition via a canvas:request_history event pattern; integrated multi-provider AI diagram generation (Groq/Gemini) with automatic fallback for zero-downtime availability.
- Implemented draggable sticky notes, image upload with drag-resize, undo/redo, emoji reactions, and dark/light theme toggle — deployed on Vercel + Render with MongoDB Atlas.

AlgoPrep | Interview Preparation Platform

React.js, Vite, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB

Live | GitHub

- Built full-stack MERN platform with secure JWT authentication using bcrypt hashing and protected routing middleware for role-based access control.
- Implemented Redux Toolkit async state management across multiple slices to efficiently handle user progress, notes, and activity tracking.
- Developed a topic-wise DSA dashboard tracking 100+ problems with a backend streak-tracking algorithm using ISO date logic to detect consecutive-day activity.

WriteFlow | Full-Stack Blog Platform

React.js, Redux Toolkit, Appwrite, React Hook Form

GitHub

- Designed and developed a feature-rich blog platform with complete CRUD operations and robust role-based access control using Appwrite as BaaS.
- Architected global state management with Redux and React Hook Form for validation, reducing unnecessary re-renders and improving UI reliability.

ACHIEVEMENTS & CERTIFICATIONS

- Winner – Web Development Competition (Web Recall), NIET — Led team to architect a responsive, interactive website evaluated on UI architecture and design fidelity.
- LeetCode, GeeksFGEEKS & Codeforces — Solved 500+ DSA problems in Java across Arrays, Trees, Graphs, and Dynamic Programming.
- Certifications — Java Fundamentals & ReactJS (Infosys Springboard).
